

# INTERSTATE 10 / PEPPER AVENUE INTERCHANGE

## COLTON, CA

### PROJECT OVERVIEW

Located on Interstate 10 in Colton, CA, the Pepper Avenue Interchange provides freeway access to and from both commercial and residential communities, most notably is the Arrowhead Regional Medical Center. This project will construct a five-lane bridge and improve ramps and drainage for better circulation on and off the freeway. Unique to this project is a federal pilot program that incentivizes hiring of local and veteran labor.

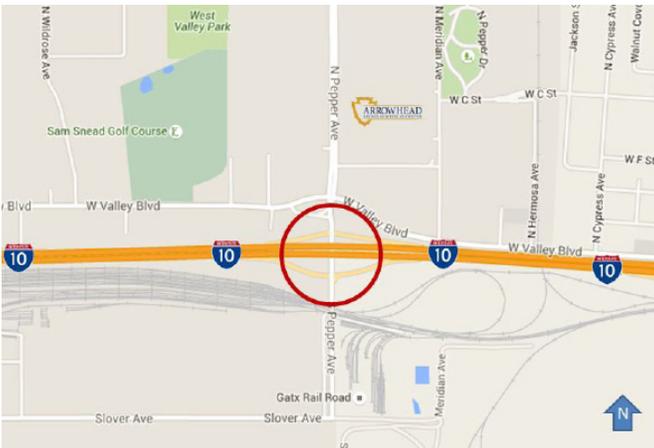

### PROJECT FUNDING

Funding for this project is a mix of Local, State and Federal funds. The City of Colton, County of San Bernardino, and SANBAG have partnered to provide the approximately \$10 million funding package needed for these necessary improvements along the busiest corridor in San Bernardino County. Measure I, the half-cent sales tax for transportation improvements, is contributing nearly \$400,000 to the project.

### PROJECT STATUS

February 2015	Environmental Clearance	March 2016	Start of Construction
June 2015	Final Design Approved	Summer 2017	End of Construction (Anticipated)

### PROJECT MAP

### FEATURES

- \* Five-lane bridge over Interstate 10
- \* On- and off-ramp improvements
- \* Bridge aesthetics consistent with community
- \* Access to and from Arrowhead Regional Medical Center
- \* Drainage enhancements
- \* FHWA Pilot Program for local and veteran hiring
